CRAFTSMANSHIP INSPIRED BY NATURE

*Natural Beauty*  
Premium Manufactured Stone Veneer

## CRAFTSMANSHIP INSPIRED BY NATURE

One glance at Selkirk Stone's manufactured stone veneer products and you can see that they are unique in design. Handcrafted to capture the texture, feel and durability of natural stone, our products are sure to enhance and beautify any project.

Tested for strength and durability, we use only the highest quality raw materials in the production process to ensure that you will receive a beautiful, as well as consistent, stone product.

Selkirk Stone is lightweight and installer friendly. The natural look adds an impressive appearance to any home or office. Add in the fact that it is surprisingly cost-effective, and you can see why it is growing in popularity among architects, builders and homeowners alike.

With over 40 combinations of styles and colors, and accessories to match, Selkirk Stone is sure to completely transform any space. From commercial to residential, interior to exterior, let Selkirk Stone help you achieve a look that will inspire strength, warmth and elegance, while providing durability for years to come.

*We believe in doing everything we can to make our customers experience with our product a memorable one.*

# PREMIUM MANUFACTURED VENEER STONE

Our stone veneer comes in a wide array of different colors and textures.

## DRystack STONE

The texture of our Drystack Stone varies from lightly weathered to chiseled in appearance. Stones range in shape from nearly square to long, slender rectangular shapes, and all edges of the stones in this profile are cut to 90 degrees to easily accommodate a tight-fitted, dry stack installation. The contemporary look of our Drystack Stone is sure to beautify your next building project.

## RUSTIC LEDGESTONE

With a distinctive, irregular, and chiseled appearance, our Rustic LedgeStone is sure to compliment any home or business. A favorite in the region, this profile is representative of the ledgeStone commonly found among the mountain ridges of the Selkirk range.

## GLACIER STONE

With more texture than a standard river rock, these stones were molded after actual glacial deposits here in the northwest. Glacier stone creates beautiful shadows when installed, due to the natural variations in thickness, shape, and texture.

FOR MORE INFORMATION VISIT [WWW.SELKIRKSTONE.COM](http://WWW.SELKIRKSTONE.COM)

Please visit our website to view all the choices.

## RUSTIC QUICKFIT

This pattern was modeled after our popular Rustic LedgeStone to create an installer friendly stone which does not require grout joints. Comprised of 4" tall panels in varying lengths, this pattern mimics the appearance of an intricate dry stacked installation. Perfect for commercial or residential applications, this profile allows even less experienced installers to achieve a beautiful end result.

## SHADOW LEDGESTONE

Our most rugged ledgeStone, Shadow LedgeStone creates beautiful shadows due to the deep relief and texture of the carefully selected stones in this profile. Whether drystacked or mortared, Shadow LedgeStone is sure to inspire conversations of craftsmanship and rugged beauty. .

## COLORS AND QUALITY FOR A LIFETIME

Visit our website at [www.SelkirkStone.com](http://www.SelkirkStone.com) for many more color options in each texture. We use a process that creates color that runs through the stone so you know your project will stand up to any climate and look good even after years of weathering.

The lightweight nature of our product makes it an ahered masonry product, which allows for installation without the need for a special footing or wall ties. It also saves on shipping and overall installation costs. Backed by our 50 year warranty, Selkirk Stone is the clear choice.
