### An Excerpt from the Book

From "The Selkirks" by Chris Celentano

*"High above and between Lake Pend Oreille and Priest Lake lies a narrow band of extremely rugged granite peaks and knife-edged ridgelines known as the Selkirk Crest. At only 19-or-so miles long, it is a relatively small range at its core; but within this range are some of the very best alpine rock climbs in the region, not to mention some absolutely stunning alpine lakes."*

*This range is home to one of the highest concentrations of black and grizzly bears in the continental United States, several packs of wolves, moose, goats, and a fairly steady but very small stream of elusive and rugged adventurers. Needless to say, the area is quite wild."*
